

Mahindra 275 DI XP Plus: A Robust Choice for Modern Farming

[Mahindra 275](#) DI XP Plus is a 37 hp tractor offered by **TractorGyan**, tailored for farmers seeking reliable power, efficient design, and long-term support.

Key Features & Performance

This model is built around a three-cylinder Extra-Long-Stroke DI engine operating at 2,100 rpm. It delivers 37 hp output and a maximum PTO power of 32.9 hp. The transmission is a partial constant mesh type with 8 forward and 2 reverse gears, enabling smooth operations in varied field tasks.

One of the prominent advantages is its hydraulic lifting capacity of 1,500 kg, supported by advanced ADDC hydraulics that allow seamless attachment of implements like cultivators, ploughs, rotavators, and trailers.

Durability & Comfort

TractorGyan notes that Mahindra backs this model with a six-year warranty — comprising two years on the full tractor and an additional four years on engine and transmission wear & tear. The brakes are oil-immersed multi-disc type, increasing control and safety under load. Steering is offered in manual or dual-acting power-steering variants, while a bow-type front axle improves balance during heavy-duty operations.

The fuel tank has capacity for 50 litres, and the tractor weighs about 1,800 kg with a wheelbase of 1,880 mm.

Price & Applications

As listed by **TractorGyan**, the Mahindra 275's price ranges between ₹ 5,50,000 to ₹ 5,75,000 (on-road/depending on location) for the year 2025.

It is suitable for multiple applications including cultivation, haulage, and general farm-use tasks. With optional implements such as rotavators, MB ploughs, trailers, and seed-planters, it becomes a versatile workhorse on medium-sized farms.
