

The Gold Standard: Leading the Pack in Top State E-Recycling Programs

As the environmental laws continue to increase in the country, it is no longer a decision whether large organizations should stay in line with the most effective state recycling schemes of e-recycling. Currently, over 25 states have enacted e-waste laws and the specifications of such laws greatly varied along the coasts. This paper demonstrates the correspondence of ERI to the most stringent provisions in the nation.

THE GOLD STANDARD STATES

California and New York are most ambitious as they have powerful legislations of Producer Responsibility. These are the best **top state e-recycling programs** that have specific reporting requirements and to the same our facilities have been optimized to ensure that manufacturers and retailers are not burdened with administrative headaches as they strive to meet their annual collection quotas. These regions are focused on the fact that the hazardous wastes like lead and mercury are not discharged into the municipal waste stream, as such wastes are supposed to be taken through forceful networks. Is it the progressive landfills models in the Midwest or our adamant landfill bans in the Northeast, it is no problem to us as a nation. We are also a one-stop destination of companies that transact business with different jurisdictions.

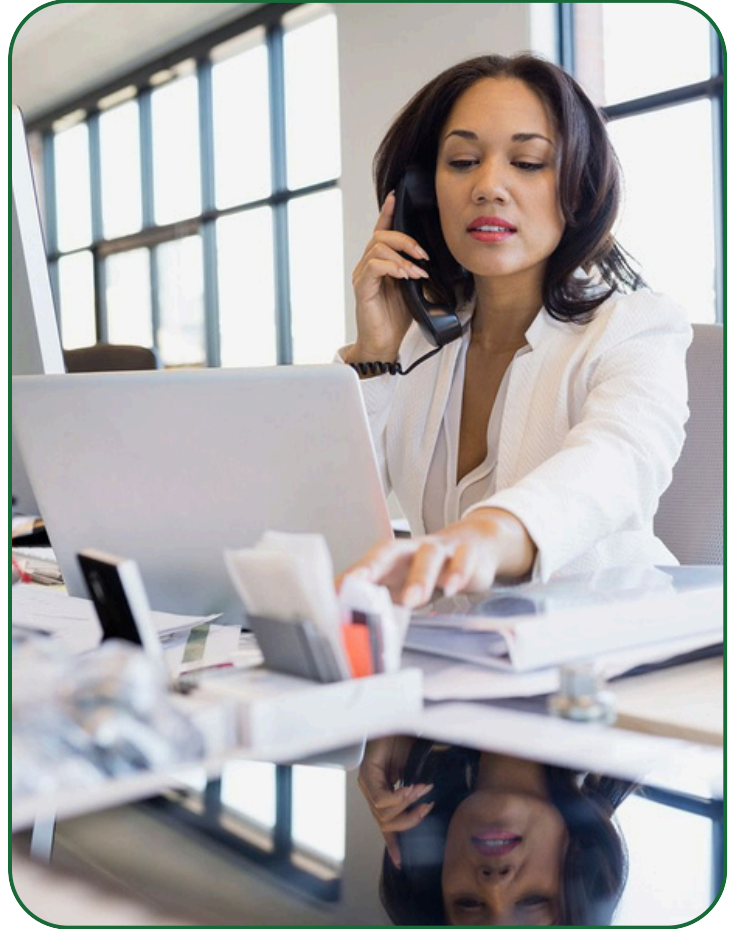

KEY APPLICATIONS AND BEYOND COMPLIANCE

Besides the way of the avoidance of fines, the participation in best state e-recycling programs is the social responsibility of the corporation. We have an effective tracking system, and you can indicate the exact amount of pounds of material you have diverted in the landfills in any given state. Such information will prove to be invaluable in regards to ESG (Environmental, Social, and Governance) reporting and building of brand trust. By the assistance of the infrastructure of ERI, you are sure that you receive the maximum certifications possible of your electronics processed, regardless of the state of production of the waste. We also ensure that the weight reporting is done with the logistics in the region to keep your business at upright position.

Thank you!

ERI has strategically established an international network in 46 countries, totaling over 100 vetted and certified facilities, to provide global coverage for our clients. ERI believes education is critical in teaching individuals and organizations about the circular economy, sustainability, and hardware cybersecurity.
