

Secure secure remote access solutions for Safe and Flexible Work Environments

Sales Literature

HELTECH Computer Consulting will start with some basic self-generated literature to establish initial positioning:

Logo and theme

A national catalog sales paper goods company has a wonderful line of blank papers with a computer theme that will serve as the "look" for HCC.

Stationery

The theme paper is available in various formats for use as company stationery.

Brochure

Likewise, pre-printed paper is available, along with software templates for generating brochures

Newspaper

Mainly published on Atrif newspaper.

Web Presence

Eventually a website will be developed as an "electronic brochure" as well as a resource site for the owner's established client base.

Response Templates

As common problems/solutions are encountered and solved, a set of standardized templates for initial responses will be developed.
